

Save Our Forests

- Human activities that use fossil-based fuels like coal, oil and natural gas emit carbon dioxide (CO₂) into the atmosphere. The release of CO₂ warms the atmosphere.
- Our average annual household CO₂ emission as we use electrical household appliances is 0.93 tons. At least 4 native trees will offset this carbon emission.
- A private vehicle emits on the average 2.4 kg of CO₂ per liter of fuel used. 15 native trees will offset an annual emission.
- CO₂ is sequestered and the impacts of climate change are abated by planting trees.
- **ROAD to 2020** will plant native trees to reforest one million hectares of forests by year 2020.
- Forests provide oxygen that is vital for our survival and ensure water supply for agriculture, industry and our household needs. For a donation of **PhP75** per seedling, you can support our tree planting activities in Caliraya Watershed in Laguna. You are welcome to plant your seedlings with us. Call **(632) 421.12.13**, or **(632) 434.46.42**, call/text **09228159235**, **09228151942**, **09228152050**, or fax **(632) 434.46.96**, or email **act@haribon.org.ph**.
- For more information about Haribon Foundation and/or to donate online, log on to **www.haribon.org.ph**.

**Be carbon neutral.
Offset your carbon footprint.
Join ROAD to 2020 campaign!**

I want to donate and adopt seedlings now!

_____ 150 Pesos= 2 seedlings	_____ 900 Pesos = 12 seedlings
_____ 300 Pesos= 4 seedlings	_____ 1,200 Pesos = 16 seedlings
_____ 450 Pesos= 6 seedlings	_____ 1,425 Pesos = 19 seedlings
_____ 750 Pesos= 10 seedlings	_____ 1,500 Pesos = 20 seedlings

Others: I will donate: (please specify)

_____ Pesos = _____ seedlings

Date: _____

Name: _____

Address: _____

Landline: _____ Mobile No: _____

Fax No: _____ E-mail: _____

I will join the tree planting activity.

I will not join the tree planting activity.

My Gift of Trees for:
